Bachelor in Computer Applications

Course Title: **English I**

Code No: Semester: I

Full Marks: **60** Pass Marks: **24** Time: **3 hours**

Candidates are required to answer the questions in their own words as far as practicable.

Note: Group A (Multiple Choice Questions) is not available from the source. The paper begins with Group B.

Group B

2. Write a couple of paragraphs on computer networks by using at least six of the following words and phrases: synchronous, screen handling, workstations, LANs, distributed systems, parses, queries, fiber-optic, distinction, protocols
3. Identify the main idea, major details and minor details in the following paragraph and write them all in the format provided at the end of the paragraph. Railway companies use large computer systems to control ticket reservations and to give immediate information on the status of their trains. The computer system is connected by private telephone lines to terminals in major train stations, and ticket reservations for customers are made through these phone lines. The passenger's name, type of accommodation, and the train schedule is put into the computer's memory. On a typical day, a railway's computer system gets thousands of telephone calls about reservation, space on other railways, and requests for arrivals and departures. A big advantage of the railway computer ticket reservation system is its rapidity because a cancelled booking can be sold anywhere in the system just a few seconds later. Railway computers systems are not used for reservations alone. They are used for a variety of other jobs including train schedules, planning, freight and cargo loading, meal planning, personnel availability, accounting and stock control. Main Idea: Major Detail A: Minor Details for the Major Detail A: Major Detail B: Minor Details For the Major Detail B:
4. What are main differences in the way images are produced on a TV screen and on a computer screen?
5. Define AI. What does the expert-system ROI do?
6. Describe the following terms used in the network configuration a) Star b) Bus/Ethernet
7. Match the following terms with their definitions.
8. Compose a dialogue between a computer dealer and a customer on the major problems with hand-based input/output.

Group C

Attempt any TWO questions [2x10=20]

-
