

C Programming

BCA — Semester II — 2019 — Answer Sheet
Subject Code: CACS151

Note: This answer sheet is currently a template. Detailed answers will be added progressively. Students are encouraged to refer to textbooks and class notes.

Group C Attempt any TWO questions[2x10=20]

2. What is software process model? Differentiate between cohesion and coupling in programming?

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

3. Define keywords and identifiers. Define rules for defining valid identifiers.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

4. List the operators used in C on the basis of utility. Explain the concept of bitwise operation.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

5. Differentiate between while loop and do while loop. Write a C program to find input number is prime or composite.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

6. What is DMA? Write a program to find the largest and smallest number in a list of n numbers using DMA.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

7. What is the difference between binary file and text file? Write a C program to write some text "Welcome to BCA program" in a file test.txt.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

8. Explain any four graphics function in C. Write a program to draw two concentric circles with center (50, 50) and radius 75 and 125.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

9. What is one dimensional array? How it is initialized? Write a C program to find the sum of two matrix of order m x n.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

10. Define structure and union. Write a C program using structure that reads the record of 35 students with member's roll, name, address and marks and display the records of students who have obtained greater than 250 marks.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

11. What is a function? List its advantages. Explain the concept of function call by value and call by reference with example.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

These answer sheets are prepared for educational purposes. Students are encouraged to verify with official textbooks and course materials.
