

C Programming

BCA — Semester II — 2020 — Answer Sheet
Subject Code: CACS151

Note: This answer sheet is currently a template. Detailed answers will be added progressively. Students are encouraged to refer to textbooks and class notes.

Group C Attempt any TWO questions[2x10=20]

2. What is computer programming? Differentiate between top down and bottom up approach of programming.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

3. What is the purpose of size of operator? Write a C program to swap the value of two integers without using third variable.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

4. Write a program in C to find all possible roots of quadratic equation $ax^2 + bx + c = 0$.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

5. Why an array is required in programming? Write a C program to input age of 30 employees into array and find out second largest age from array.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

6. What is recursive function? Write C program to generate the Fibonacci series up to 13th term using recursive function.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

7. What is the advantage of pointer? Write a C program to store 10 integers into memory and find out minimum and maximum using dynamic memory allocation (DMA).

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

8. What is the use of `initgraph()` in C program? Write a program to draw line and circle and rectangle using graphic function.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

9. What is structure? Write a C program to enter id, name and address of 25 structure variable called employee and sort them in ascending order on the basis with use of pointer.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

10. Is break keyword mandatory in switch statement? Write a program to calculate arithmetic operations (+, -, *, /) using switch case statement.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

11. What do you mean by Software Development Life Cycle? Explain waterfall modelw advantage and disadvantage.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

These answer sheets are prepared for educational purposes. Students are encouraged to verify with official textbooks and course materials.
