

Software Engineering

BCA — Semester IV — 2025 — Answer Sheet

Subject Code: CACS253

Note: This answer sheet is currently a template. Detailed answers will be added progressively. Students are encouraged to refer to textbooks and class notes.

Group B

2. What are the key challenges that the software engineering is facing? What are the attributes of good software?

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

3. What is Model View Controller, Explain?

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

4. What is the role of Human-Computer Interaction (HCI) in User Interface Design?

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

5. What do you mean by software re-engineering? Briefly explain the re-engineering process with the aid of a suitable block diagram.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

6. Differentiate between cohesion and coupling. With proper example.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

7. What are the skills necessary to handle software project? Explain different software – projects management skills?

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

8. Explain Software Project Management Plan(SPMP).

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

Group C

Attempt any TWO questions[2x10=20]

9. Explain spiral model of software development? In what kind of project we recommend to use this model of software development.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

10. Discuss the steps involved in Software Requirement Elicitation and Analysis. Explain how interviews, use cases, and scenarios are used in this process.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

11. a) Explain the basic concept of the COCOMO model and its significance in software project estimation. b) Explain the difference between Black-box and White-box testing techniques.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

These answer sheets are prepared for educational purposes. Students are encouraged to verify with official textbooks and course materials.
