2023

Bachelor in Computer Applications

Course Title: **Software Engineering**

Code No: **CACS253** Semester: **IV**

Full Marks: **60** Pass Marks: **24** Time: **3 hours**

Candidates are required to answer the questions in their own words as far as practicable.

Note: Group A (Multiple Choice Questions) is not available from the source. The paper begins with Group B.

Group B

2. What is software engineering? Explain the need of software life cycle models Engineering.
3. What is configuration management? What are the five levels of CMM? List important features of these levels.
4. What is meant by modular design? When and how should a modular design be implemented?
5. Write a detailed note on coding standards.
6. Why is SRS document also known as the black box specification of the system? Explain with example.
7. What do you mean by project management? Explain the project planning and project scheduling with example.
8. Explain COCOMO model for software cost estimation in detail.

Group C

Attempt any TWO questions[2x10=20]

9. What is configuration management? What are the five levels of CMM? List important features of these levels.
10. Explain the software requirement analysis and specification. Discuss various methods for requirement gathering.
11. Write a detailed note on test case design techniques. Which method is best in integration testing? Top-down or bottom-up? Support your answer.
