

DotNet Technology

BCA — Semester V — 2022 — Answer Sheet
Subject Code: CACS302

Note: This answer sheet is currently a template. Detailed answers will be added progressively. Students are encouraged to refer to textbooks and class notes.

Group B

2. What do you mean by "safe" programming language? Explain any four applied technologies in DotNet framework.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

3. List any five canonical keywords in "C#". Write a C# program to initialize and display array element with sum of each power.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

4. What is string interpolation? How passing argument by value is differing from passing argument by reference? Explain with program.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

5. What are sealed classes in C#? Write a C# program to illustrate the concept of abstract class and abstract method.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

6. What is virtual method? Write a program to illustrate multi-level inheritance with virtual method.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

7. What is different between index and properties? Explain the concept of generic class in C# with 8 suitable program.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

8. Write a program to create form for calculating simple interest in one ASP.NET page and display the simple interest in another page of ASP.NET.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

Group C

Attempt any TWO questions[2x10=20]

9. a) What is System Exception? Write a C# program that will read balance and withdraw amount from keyboard and display the remaining balance on screen. if balance is greater than withdrawal amount otherwise throw an Application Exception with appropriate message.b) List any five LINQ standard operators? Write a C# program to compute aggregate salary of 5 employee and then display employee record in descending order with respective employee salary using LINQ.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

10. What are different type of delegate in C#? Write a C# Program to create a class 'Time' which represents time. The class should have three fields for hours, minutes and seconds. It should have constructor to initialize hours, minutes and seconds and method Time() to print current time.overload following operators a) +(Add two time objects of 24 hours clock) b) Compare two time objects

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

11. What is difference between executeScalar() and executeReader() method? Write a C# program to connect database Bank and insert 5 customer record (Account_no, Name, Address, Balance) in Customer table and Display the customer record whose balance is greater than 5000.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

These answer sheets are prepared for educational purposes. Students are encouraged to verify with official textbooks and course materials.
