

Advanced Java Programming

BCA — Semester VI — 2021 — Answer Sheet

Subject Code: CACS354

Note: This answer sheet is currently a template. Detailed answers will be added progressively. Students are encouraged to refer to textbooks and class notes.

Group C Attempt any TWO questions[2x10=20]

2. Why do we need a top-level container like JFrame to write Java programs with GUI? How can we display two-dimensional objects in Java?

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

3. Explain JTextField and JTextArea components of the Java Swing library.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

4. How do you execute SQL statements using JDBC? Explain with an example.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

5. Compare result set with row set. Explain a prepared statement with an example.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

6. How do you set and get Cookie in Servlet? Explain using a suitable Java program.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

7. Explain different scripting elements of JSP with examples.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

8. Write short notes on (Any Two): a) Java web frameworks b) CORBA c) Bean bound property

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

9. Write a GUI application to find the sum and difference of two integer numbers. Use two text fields for input and a third text field for output. Your program should display the sum if the user presses the mouse and the difference if the user releases the mouse.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

10. What is a bean design pattern? Explain simple, Boolean, and indexed property design patterns with suitable examples in detail.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

11. Define RMI. What is stub and parameter marshalling? Write a client/server application using RMI to find the product of two numbers.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

These answer sheets are prepared for educational purposes. Students are encouraged to verify with official textbooks and course materials.
