

Advanced Java Programming

BCA — Semester VI — 2023 — Answer Sheet

Subject Code: CACS354

Note: This answer sheet is currently a template. Detailed answers will be added progressively. Students are encouraged to refer to textbooks and class notes.

Group B

2. What is the role of Event Listener in event handling? List different event listeners provided by Java.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

3. What is KeyEvent? Explain with a proper example.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

4. What is the use of RowSet interface? Explain connected and disconnected rowsets.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

5. What are bounded and constrained properties in JavaBeans? Explain the advantages of Java beans.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

6. What are the key methods provided in HttpSession interface for handling sessions? Explain.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

7. Explain RMI architecture in Java in detail.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

8. Write short notes on (any two): a) Adapter classes b) CORBA c) Life cycle of a servlet

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

Group C

Attempt any TWO questions[2x10=20]

9. How a frame can be created in Java? Explain. Write a program to create a GUI application in Java that identifies the smaller and greater number between two input numbers taken through two text fields and displays the result in a label. If the user presses the mouse it should display the smaller number and if the user releases the mouse it should display the greater number.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

10. Explain JDBC architecture. Write a program to insert three records into a table Item which is in the database Shop and contains the columns ItemID, Name, UnitPrice, Units and ExpiryDate.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

11. Differentiate between servlet and JSP. Create a servlet that computes and displays the factorial of an input number entered from a page when the button from that page is pressed by the user.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

These answer sheets are prepared for educational purposes. Students are encouraged to verify with official textbooks and course materials.
