2021

Bachelor in Computer Applications

Course Title: **Network Programming**

Code No: **CACS355** Semester: **VI**

Full Marks: **60** Pass Marks: **24** Time: **3 hours**

Candidates are required to answer the questions in their own words as far as practicable.

Note: Group A (Multiple Choice Questions) is not available from the source. The paper begins with Group B.

Group B

2. Define Client-Server software model. Explain the features of Java as a Network programming language.
3. What is the use of the NetworkInterface Class? Explain the basic features of the NetworkInterface class.
4. Explain HTTP methods with examples.
5. Write a program to display the socket information [address, port, local address, local port].
6. Write a server-side program for a daytime service using socket.
7. Define Non-blocking I/O. Differentiate between blocking and non-blocking socket communication in Java.
8. Write Short Notes on (Any Two): a) Secure Communication b) Multicast Sockets c) RMI Server

Group C

Attempt any TWO questions [2x10=20]

9. What is the procedure for constructing and connecting Server sockets? Explain the Server Socket options with examples.
10. Write a program to perform a basic two-way communication between client and server.
11. What are the features of DatagramPacket and DatagramSocket Class? Write a program to create a simple UDP client.
