2021

Bachelor in Computer Applications

Course Title: **Cloud Computing**

Code No: **CACS402** Semester: **VII**

Full Marks: **60** Pass Marks: **24** Time: **3 hours**

Candidates are required to answer the questions in their own words as far as practicable.

Note: Group A (Multiple Choice Questions) is not available from the source. The paper begins with Group B.

Group B

2. Define cloud computing? list out characteristics of cloud computing.
3. Differentiate between distributed Computing and cloud computing.
4. Comparison between public clouds and private clouds with example.
5. What are the advantages of OS level virtualization?
6. Discuss the applications of map reduce.
7. Explain the software-as-a-Service security with example.
8. write short notes on (AnyTwo)a) Hybrid Cloudsb) Scientific applicationsc) Data Security

Group C

Attempt any TWO questions[2x10=20]

9. Explain the cloud deployment models, in detail with their benefits and limitations while implementing and application.
10. Differentiate between full-virtualization and para-virtualization also give one example VMM (virtual machine monitor) that was built in each of the two categories.
11. Explain the different techniques used for data encryption in cloud computing with example.
