

Database Administration

BCA — Semester VII — 2025 — Answer Sheet

Subject Code: CACS485

Note: This answer sheet is currently a template. Detailed answers will be added progressively. Students are encouraged to refer to textbooks and class notes.

Group B

2. What are data files? How it is related with tablespace? Write a command to add a datafile in existing tablespace.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

3. Explain the different methods of network configuration to connect to the oracle database.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

4. Explain the different privileges in an oracle database and explain how you can grant and revoke the privileges to the user with examples.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

5. What is profile? Why is it important? Explain with an example.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

6. Explain how PDBs are related to CDB in multitenant architecture. Also mention the common things that they share with each other.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

7. What is multiplexing? Why is it needed? Write the steps of multiplexing the control files.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

8. Explain the use of sequence in oracle database with example.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

Group C

Attempt any TWO questions[2x10=20]

9. Discuss backup, restore and recovery in oracle database. As a DBA of an organization, explain your backup and recovery strategy. Explain how you can recover the database in case of different types of failure. Also explain the process of media recovery.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

10. Explain oracle database architecture in detail including memory, process, and storage structure of oracle database.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

11. What is scheduler and why scheduler is important in oracle database? Explain the different components of the scheduler with their workflow. Also explain the difference between time-based scheduling and event-based scheduling.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

These answer sheets are prepared for educational purposes. Students are encouraged to verify with official textbooks and course materials.
