

Bachelor in Computer Applications

Course Title: **Introduction to Information Technology**

Code No: Semester: **1**

Full Marks: **60** Pass Marks: **24** Time: **3 hours**

Candidates are required to answer the questions in their own words as far as practicable.

Note: Group A (Multiple Choice Questions) is not available from the source. The paper begins with Group B.

Group B

1. What is the purpose and function of firewall? Name and explain the three types of firewall.
2. List and describe the characteristics of the computer. Explain the significant limitations of the computer.
3. What is switching technique? Name the three kinds of switching techniques. Describe briefly the circuit switching and message switching techniques.
4. Explain Database Management system and its importance. Define Data redundancy and Data inconsistency.
5. What are the parts of CPU? Explain each.
6. What is instruction cycle? Explain the steps of instruction cycle.
7. Convert 44.467 from Base 10 to Base 16.
8. What is Software? What are the two main categories of software? Explain each in brief.
9. Define: (1) Internet, (2) Protocol, and (3) WWW. What is the function of TCP/IP protocol?
10. Discuss the impact of IT in organization and Individuals.
11. What do you mean by sequential access and direct access of the I/O devices? Give an example of sequential access device and direct access device.
12. Write short notes on: a. IOT b. Data warehousing and data mining.
