

Bachelor in Computer Applications

Course Title: **Introduction to Information Technology**

Code No: Semester: **1**

Full Marks: **60** Pass Marks: **24** Time: **3 hours**

Candidates are required to answer the questions in their own words as far as practicable.

Note: Group A (Multiple Choice Questions) is not available from the source. The paper begins with Group B.

Group B

1. Explain the reason of using hexadecimal and octal number system in computer? Add decimal number 23 and 12 using binary addition and verify the result with the help of decimal system.
2. What do you mean by network topology? Explain the features of Bus, Star, and Ring topologies.
3. What is security mechanism? List the technologies used for implementing the security mechanisms.
4. What are the key features of fourth Generation of computer? Explain.
5. What are three parts of Central Processing Unit (CPU)? Explain.
6. What is Deadlock? What are the reasons for deadlock?
7. What is Binary Encoding? Why computers use Binary Encoding?
8. Explain about Physical address and Logical address.
9. Explain characteristics of Database system in brief.
10. What is security policy? Explain.
11. Explain impacts of IT on organizations.
12. Write short notes on: a. Importance of Networking b. Digital signature
