

Bachelor in Computer Applications

Course Title: **System Analysis and Design**

Code No: Semester: **4**

Full Marks: **60** Pass Marks: **24** Time: **3 hours**

Candidates are required to answer the questions in their own words as far as practicable.

Note: Group A (Multiple Choice Questions) is not available from the source. The paper begins with Group B.

Group B

1. What is system development life cycle (SDLC)? Explain each phase of SDLC in detail.
2. What is project planning? Explain project initiation and planning in detail.
3. Draw context diagram and data flow diagram for online food ordering system upto level2 which is used to sell different food items to its customers online.
4. Explain object-oriented development with class diagram.
5. Why is project management important? How can you use network diagram to schedule software projects?
6. What is data modeling? Draw an ER diagram to keep records of students, courses, and grades at your college.
7. What is identification and selection of system development project? Explain.
8. How can you use interviewing technique to determine system requirements? Explain.
9. How do you design interfaces and dialogues?
10. Why documentation and training are important?
11. Define system maintenance. How do you conduct system maintenance?
12. Write short notes on:
a. Rapid application development
b. Economic Feasibility.
