Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

11. Here is an extract from a speech made by a careers advisor to a group of students choosing their future courses of study at university. Complete the speech by choosing one of the words from the box: machines, highway, mechanical, chemical, civil, physics, electrical, development, production, electronic, Engineering. Students should have an understanding of maths, (a) and chemistry. Working with pharmaceuticals, food, mineral processing and chemical manufacturing, a (b) engineer is trained to understand, design, control, and investigate material flows. If you enjoy problem solving and find projects such as the Channel Tunnel and the Three Gorges Dam interesting, (c) engineering may be for you. You will produce creative designs at an economical price while paying due concern to the environment. If your interest is in road building then you may decide to follow a specialized course in (d) engineering. By studying (e) and (f) engineering you learn about the design of complete systems, such as computers, controllers, power and transport systems. (g) engineers plan, design and (h) a wide range of things: washing machines, cars and spacecraft. (i) engineers work very closely with mechanical engineers, to make new products at the right price, on time and in the correct quantity. As well as designing and selecting (j) and materials, they also organize people and finance.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

12. Write short notes on: a) Etiquette. b) Resume

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

These answer sheets are prepared for educational purposes. Students are encouraged to verify with official textbooks and course materials.
