

Bachelor in Computer Applications

Course Title: **Research Methodology**

Code No: Semester: **6**

Full Marks: **60** Pass Marks: **24** Time: **3 hours**

Candidates are required to answer the questions in their own words as far as practicable.

Note: Group A (Multiple Choice Questions) is not available from the source. The paper begins with Group B.

Group B

Attempt any Eight questions[8x5=40]

1. Define research problems, research questions, research objectives and research hypotheses. Explain how they are interrelated.
2. List different formats of citation and referencing. Discuss, in brief, American Psychological Association (APA) format of citation and referencing for books, reports and Journal articles with two examples.
3. What is primary data? Explain different methods of collecting primary data.
4. What is stratified sampling? Discuss the condition under which stratified sampling is more suitable than simple random sampling.
5. Define reliability and describe different methods of estimating reliability of a measuring scale.
6. Differentiate between sampling error and non-sampling error.
7. What is a case study? Discuss the limitations of a case study.
8. What is called a research report? Describe the format of an academic research report.
9. Explain research hypotheses and their sources.
10. Discuss the importance of literature reviews.
11. Describe different graphical methods of data presentation.
12. Write a short note on the following: a. Sampling Frame b. Non-probability sampling
