CSIT — 5th Semester — 2082 — Answer Sheet
Subject Code: CSC329

Note: This answer sheet is currently a template. Detailed answers will be added progressively. Students are encouraged to refer to textbooks and class notes.

Section A

1. Define CSS. What is the use of CSS shadow effects? Write an HTML script with proper CSS as per the following description: Display a text content "CSIT Exam" in a div with id div1. The text should have a horizontal shadow of 3px and a vertical shadow of 2px. The shadow color should be green. Also set the horizontal and vertical shadow of the div to 10px respectively with the shadow color of div to blue.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

2. What are jQuery selectors? Explain jQuery callback and chaining effects with appropriate jQuery scripts.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

3. What is the use of XML? Create a XML file having complex type elements containing other elements and text. At least one element should contain an attribute. Similarly, there should be elements containing string, integer and date type values. Now write the equivalent XSD for the XML.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

Section B

Attempt any Eight questions[8×5=40]

4. Define web clients and web servers with examples.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]
