

## C Programming

CSIT — 1st Semester — 2074 — Answer Sheet  
Subject Code: CSC115

**Note:** This answer sheet is currently a template. Detailed answers will be added progressively. Students are encouraged to refer to textbooks and class notes.

### Section A

**1. Discuss structure of a C program with suitable example.**

*Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]*

**2. Discuss different types of its statements with suitable example of each. Different if statement with switch statement.**

*Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]*

**3. What is the structure? How is it different from array? Create a structure student having data members name, roll number and percentage. Complete the program to display the name of student having percentage greater than or equal to 60**

*Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]*

### Section B

Attempt any Eight questions[8×5=40]

**4. What is algorithm? How is it different from flow chart?**

*Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]*

**5. What is conversation? Discuss type casting with suitable example.**

*Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]*

**6. Discuss increment and decrement operator with example**

*Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]*

**7. Write a program that computes the sum of digits of a given integer number**

*Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]*

---

**8. What is function? Discuss the benefits of using function.**

*Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]*

**9. Write a program to find sum and average of 10 integer numbers stored in an array.**

*Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]*

**10. Define pointer. Discuss the relationship between pointer and one-dimensional array.**

*Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]*

**11. Write a program to read and print data stored in a file input.txt.**

*Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]*

**12. Why do we need graphics functions? Write a program to draw a circle.**

*Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]*

---

*These answer sheets are prepared for educational purposes. Students are encouraged to verify with official textbooks and course materials.*
