

2074

Bachelor of Science in Computer Science and Information Technology

Course Title: **C Programming**

Code No: **CSC115** Semester: **1st Semester**

Full Marks: **60** Pass Marks: **24** Time: **3 hours**

Candidates are required to answer the questions in their own words as far as practicable.

Section A

1. Discuss structure of a C program with suitable example.
2. Discuss different types of it statements with suitable example of each. Different if statement with switch statement.
3. What is the structure? How is it different from array? Create a structure student having data members name, roll number and percentage. Complete the program to display the name of student having percentage greater than or equal to 60

Section B

Attempt any Eight questions[8×5=40]

4. What is algorithm? How is it different from flow chart?
5. What is conversation? Discuss type casting with suitable example.
6. Discuss increment and decrement operator with example
7. Write a program that computes the sum of digits of a given integer number
8. What is function? Discuss the benefits of using function.
9. Write a program to find sum and average of 10 integer numbers stored in an array.
10. Define pointer. Discuss the relationship between pointer and one-dimensional array.
11. Write a program to read and print data stored in a file input.txt.
12. Why do we need graphics functions? Write a program to draw a circle.
