

2078

Bachelor of Science in Computer Science and Information Technology

Course Title: **C Programming**

Code No: **CSC115** Semester: **1st Semester**

Full Marks: **60** Pass Marks: **24** Time: **3 hours**

Candidates are required to answer the questions in their own words as far as practicable.

Section A

1. What do you mean by jump statement? Explain each jump statement with example. Write a program to check whether a number entered is prime or not.
2. Explain any three string functions. Write a program to check if two matrices are identical or not.
3. Define structure. Explain nested structure with example. Create a structure named book with name, author, and publisher as its members. Write a program using this structure to read data of 50 books and display name of those books published by "XYZ" publisher.

Section B

Attempt any Eight questions[8×5=40]

4. Explain structure of a C program with suitable example.
5. What is variable? How is it different from constant? How do you write comments in C?
6. Explain formatted I/O functions in detail.
7. Write a program using your own function to find sum of two numbers.
8. Write a program to print largest among three numbers entered by the user.
9. Explain dynamic memory allocation with example.
10. Write a program that simply reads data from a file.
11. Write a program to draw a line using graphics function.
12. Write short notes on:
a. History of Cb. Bitwise operator
