

Mathematics II

CSIT — 2nd Semester — 2081 — Answer Sheet
Subject Code: MTH168

Note: This answer sheet is currently a template. Detailed answers will be added progressively. Students are encouraged to refer to textbooks and class notes.

Section A

1. Define augmented matrix with an example. Find the general solution of the linear system whose augmented matrix is $\left[\begin{array}{ccc|c} 1 & 6 & 2 & -5 \\ -1 & 0 & 3 & 1 \\ 0 & -1 & -2 & 3 \end{array} \right]$.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

2. (a) Let $A = \begin{bmatrix} 2 & 0 \\ 0 & 2 \end{bmatrix}$, and define $T : \mathbb{R}^2 \rightarrow \mathbb{R}^2$ by $T(x) = Ax$. Find the image under T of $u = \begin{bmatrix} 1 \\ -3 \end{bmatrix}$, $v = \begin{bmatrix} a \\ b \end{bmatrix}$. (b) Prove that a map $T : \mathbb{R}^2 \rightarrow \mathbb{R}^2$ defined by $T(x, y) = (y, x)$ is linear.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

3. Define inverse of a matrix. Find the inverse of a matrix $A = \begin{bmatrix} 1 & 0 & 3 \\ 0 & 1 & 2 \\ -3 & 4 & 8 \end{bmatrix}$, if it exists.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

Section B

Attempt any Eight questions [8×5=40]

4. Verify that $(AB)^{-1} = B^{-1}A^{-1}$ if $A = \begin{bmatrix} 1 & 1 \\ 3 & 4 \end{bmatrix}$ and $B = \begin{bmatrix} 2 & 1 \\ 5 & 3 \end{bmatrix}$.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

5. Find LU factorization of $\begin{bmatrix} 2 & 5 \\ 6 & -7 \end{bmatrix}$.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

6. Compute the determinants by cofactor expansions $\begin{vmatrix} 6 & 0 & 0 & 5 \\ 1 & 7 & 2 & -5 \\ 0 & 0 & 0 & 8 \\ 3 & 1 & 8 & \end{vmatrix}$.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

7. Show that the column vectors $u = \begin{bmatrix} 1 \\ 0 \\ -1 \end{bmatrix}$, $v = \begin{bmatrix} 2 \\ 1 \\ 3 \end{bmatrix}$, $w = \begin{bmatrix} 4 \\ 2 \\ 6 \end{bmatrix}$ and $x = \begin{bmatrix} 3 \\ 1 \\ 2 \end{bmatrix}$ is x in $\text{span}\{u, v, w\}$.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

8. Let $B = \{b_1, b_2\}$ and $C = \{c_1, c_2\}$ be bases for a vector space V , and suppose $b_1 = 6c_1 - 2c_2$ and $b_2 = 9c_1 - 4c_2$, then (a) find the change of coordinates matrix from B to C . (b) find $[x]_C$ for $x = -3b_1 + 2b_2$.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

9. Let $A = \begin{bmatrix} 1 & 6 \\ 5 & 2 \end{bmatrix}$. Find the eigenvalues and eigenvectors of A .

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

10. Determine the least squares error in the least-square solution of $Ax = b$, where $A = \begin{bmatrix} 4 & 0 \\ 0 & 2 \\ 1 & 1 \end{bmatrix}$, $x = \begin{bmatrix} 1 \\ 2 \end{bmatrix}$ and $b = \begin{bmatrix} 2 \\ 0 \\ 11 \end{bmatrix}$.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

11. Prove that the binary operation $*$ defined on Z by letting $m * n = m + n + 1$ is commutative and associative.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

12. Show that $(Q, +, \cdot)$ forms a ring.

Answer: [Detailed answer will be added soon. Students should write a comprehensive answer covering key concepts, examples, and diagrams where applicable.]

These answer sheets are prepared for educational purposes. Students are encouraged to verify with official textbooks and course materials.
